

FLSF Contractor

The Fisheries Leadership & Sustainability Forum (FLSF) is a partnership of the Nicholas Institute for Environmental Policy Solutions and the Nicholas School of the Environment and Earth Sciences at Duke University, the Center for Ocean Solutions managed by the Woods Institute for the Environment at Stanford University, and Environmental Defense Fund, Incorporated (EDF).

FLSF provides continuing education, professional development opportunities and ongoing support for Regional Fisheries Management Council members. Our programs are intended to enhance managers' understanding of fisheries and ocean science, economics and policy and broaden their leadership skills. We accomplish this by hosting forums and workshops, and providing ongoing support tools on current topics that council members are facing.

FLSF has key staffers at each institution – Duke, Stanford and EDF – who operate as a team in developing program products, including curricula, research papers, and Forum-sponsored events and meetings. FLSF is searching for a consultant for 6 months to serve as project coordinator. The ideal candidate should possess the following qualifications and skills:

- Strong written and oral communication skills;
- Experience in fisheries law, science, or policy, particularly with regional fishery management councils; and
- An ability to run meetings and serve as overall coordinator for the team.

Contract Duration: March 2010 through August 2010

Collaborating with on a daily and weekly basis: Duke and Stanford FLSF Co-Directors and Duke FLSF Policy Analyst

Reporting to: Oceans National Policy Director at Environmental Defense Fund

Contact: Whitney Tome, FLSF Coordinator, wtome@edf.org or (202) 572-3305
